EXPERIENCE

- **Addwise Tech Innovations** May 2025 – Jul 2025
Software Engineering Intern
 - Developed REST APIs using Node.js with Supabase PostgreSQL for efficient backend data management.
 - Built a Role-Based GPS Device Management and Tracking System with secure QR-based onboarding and device management.
 - Integrated Leaflet.js for real-time geospatial visualization and route tracking.
 - Validated REST APIs using Postman to ensure functionality and reliability.
 - Implemented role-based authentication and authorization to improve application security.

PROJECTS

- **Arogya Sathi — AI-Powered Rural Healthcare Assistant** ([View](#))
 - Developed an AI-powered healthcare assistant enabling multilingual health guidance for rural users.
 - Built secure health record and symptom tracking modules for patient data management.
 - Integrated speech-to-text and text-to-speech capabilities to improve accessibility and user interaction.
 - Utilized AWS cloud services for scalable backend integration and healthcare resource management.
- **LearnMate AI — Adaptive AI Tutor & 3D Learning Assistant**([View](#))
 - Built an AI-powered adaptive learning platform using FastAPI, React.js, and JavaScript.
 - Integrated Google Gemini API with Ollama fallback for dynamic content generation and offline AI responses.
 - Developed a learner memory system for personalized learning recommendations and adaptive quizzes.
 - Created an interactive 3D virtual assistant using Three.js.
 - Implemented web content retrieval and summarization for AI-assisted learning resources.
- **RouteCraft — Smart Multi-Modal Travel Planner**([View](#))
 - Developed a web-based travel planning platform integrating multiple transportation modes into a unified interface for efficient route comparison.
 - Built route search, preference-based filtering, and route optimization modules using TypeScript, Vite, and Node.js.
 - Integrated Google Maps API, RailRadar API, and Uber Deep Links for route visualization, transport information, and booking redirection.
 - Designed a modular architecture following the Incremental SDLC model for scalability and maintainability.

SKILLS

- **Languages:** C, C++, Python, JavaScript, SQL
Frontend: React.js, HTML5, CSS3, TypeScript, Vite
Backend: Node.js, Express.js, FastAPI
Databases: PostgreSQL, MySQL
Cloud: AWS
AI/ML: LLMs, NLP, RAG, Google Gemini API, Ollama
Concepts: Object-Oriented Programming, Data Structures & Algorithms, REST APIs
Tools: Git, GitHub, Postman, Figma, VS Code

OPEN SOURCE CONTRIBUTIONS

Contributed merged pull requests to open-source repositories:

KanaDojo: github.com/lingdojo/kana-dojo

Coop: github.com/roostorg/coop

ACHIEVEMENTS

- 2nd Prize — Global Goals Hackathon among 50+ teams.
- Winner — Film Gala 2024 among 10 teams.

EDUCATION

- **SRM University AP** 2023 – 2027
B.Tech Computer Science Engineering CGPA: 8
